Disclaimer:

The use of U.S. Customary Units (feets, inches) is not the preferred measurement system. The preferred measurement system is the International System of Units, which uses the Metric System. Unfortunately, the preferred system could not be used due to a lack of resources to convert the Americo-centric scientific data. Funds have been unavailable for some time now. If you are interested in contributing to the Movement for Metric Measurement, please visit: <http://www.mmmetric.com/>.
